

562nd Knowledge Seekers Workshop October 31, 2024

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias)

ENGLISH TRANSCRIPTION

(:12)

K- Good morning, good day to you, as usual, whenever, wherever you listen to this series of Knowledge Seekers program from Keshe Foundation Spaceship Institute, we are back. And with a lot of joyful time to come, and a lot of things to be able to learn and to share.

In the process of creation, mankind always has looked at the physical dimension (D). And not on the dimension of the Creation, and how the two merges. Past few weeks we've shown how your body is structured, through amino acid (AA), that one part is a physical and one part is a Universal Energy. And in the physical part, you communicate with voice, with noise, with sight, with everything else, with kicking or whatever, that one knows you exist and what you are communicating. On the other side, which is the Energy side, which is connected to Universal line of energies, where we are created to, or that call, this is the string at the end of the balloon, which connects the balloon to his, somebody's hand, or a source, a point, where the balloon is the body of the man, physicality (P) of the man. We have to see how that side communicates. We visualize our dream. We visualize it because we have decoding system which once the energy enters it, that decoding system creates its own image. (:14) And then we see it as dream, or we receive it as a noise, information or whatever. This is what we do, we send a message down the computer lines, and then when it receives by the other side, the other end, it converts it to an image, then we know this is what image the other side has sent. Or, the interaction of the fields has created, we call it a noise or lines, on the screen we see, some of it is made by the person sending you the picture, and some of it's lines and noises which is made by the equipment itself which still manifests itself as an image on the screen.

So our brain is an image converter from the energies which receives, and man calls this a dream. When he sees the conversion through the eye holes, which comes through the eye, neuro system to the brain, we call it the image of reality of physicality. But unfortunately, the dimension of the energy fields of the Universe (U), which work on the dimension of the energy side of the brain, still interact with this, this material called the brain of the man and each information once it's done has certain strength which converts itself to the image of what we call, the dream, because now it's converted its energy and we know what these energies are. One energy is the level of the mother, one energy is the level of a stone, the flower, and everything else which our brain recognizes as.

But how much of it does our brain deciphers and some doesn't decipher because it does have no reference point to it. (:16) What does this mean? It's like I spoke with the Chinese, with the eyes not centralized, one eye looks a slightly different way to the other,

so the brain continuously decides which eye is giving the right information and you recognize it as ?? me. If you close the eye of a Chinese man, which, or a woman, which has this defect on the eye and just try to carry them the information, they are in a huge dilemma. Because they trust the ears both to give the same, but they don't trust the eyes. Because it's automatically needs confirmation of. It's very easy to confuse the Chinese with the eye re-positioning, it's extremely easy to do. Because they visually what they see the brain automatically by birth has recognized which picture is real or mixture of the two gives them three-dimensional reality.

It's the same with our brain, we receive the information in a three-dimensional and then our brain deciphers, it's a decoder, and then during the day that image is continuously there but we have nobody working on that screen. It's like you've seen these two new systems that they put two monitors next to each other to make a half circle monitor, nobody is watching the left, what you call monitor. You're only watching the right monitor, which is your physical dimension of life. If you learn to be able to monitor and watch the both screen at the same time, then the life becomes interesting, because on one side you have the physical dimension when you're looking, and one side is the what we call, (:18) Universal energy dimension conversion the brain. This is what our transmutation at the moment is doing with a lot of Knowledge Seekers (KS). They see themselves physically but they go somewhere else in energy but they're aware of the body still left. As our Australian friend wrote a couple of days ago, I was in Athens, I could feel, I could touch, everything was so real, but I knew my physical body is at home. This is the next step to be able to create a trust in when you're in Athens, to call the physicality over, to give the trust that I can come back home.

The reason you have watching one of the screens, and both of the screens due to the training you're getting from the Keshe Foundation plus on top of what we naturally know has to become a norm. In a way, I want to cross the road, I can see the car, I can see the drivers, whatever. Then I look at my energy side which is connected to the energy side of the driver. Sorry, I'm thinking about my grandmother, I have no attention to the road. Don't cross to get the physicality to stop, because I'm going to hit it, because the guy is dreaming somewhere else. And this is why suddenly you're crossing the road and somebody pulls you back. It's the Energy side, the Soul side, where with the driver side that is coming, you pull it back.

If you close your eyes and going to the repair condition what we call, sleep, (:20) now the left screen is working. And the information still comes, the brain has to decipher, you call it a dream. Man has not learned to use, to be aware, to collaborate the energy side with the physical side. And this is why man has a problem even in transmutation. Because in watching the two screen he has a problem let alone bringing to be able to bring the left screen on the right side, on the right side on the left side, and collaborate the two to get one screen. Why do you need two? Why do you need two eyes? Man in the passage of Space, when he becomes Man of Space, you'll find many, many creatures use only one eye. Because the dimension of the trust in the line of the connection to Universal Energy and a physical dimension is one. Very few creatures, very, very few

creatures in the Universal Community like man with two eyes and everything in two parts because of the matter state of the, what you call it, the creation.

Now this is the problem we have with you lot. When we get you into the Wellness system individually and you are there to do something, we see the whole both side comes together. You read of one ?? human shape. When we put you in a group, try to transmute you or put you individually in transmutation, the lack of trust eliminates the power of transmutation. (:22) How can you build this? How can you change this? How can you become the controller of the whole structure of your life? As one of Knowledge Seekers says, "I was dreaming and in a dream I had a dream. In my dream I was dreaming about such and such a thing." Now, imagine that. What does it mean? It means in the dimension of the energy of the Universe, you still can dream. It's the extension of evolution in understanding the way you dream in a physical condition through the Soul of the Physicality (STP) and physicality (P), which has nothing to do with the connection to the Universal life, the Soul of the Man (STM) has the same characteristics.

In a way, through connection with the fields of the Creator, the essence of the Creation, sees the connection of what needs the energy level to do. Then you bring that at the same time hitting the what I call, the translator, the transformer of the energy, which is the brain of the man to become information that you see a dream of a dream. And then at the same time you have a dream of physicality.

In the process of Creation this is part of the structure of understanding how you will be able to transmute and how you'll be able to transfer. (:24) A lot of people call it 'deja vu' in English, in French. That means, I've seen this before I've been there, it's just like a repeat of. There is not a repeat of, there is nothing called, "I've seen this before." You see what you think you've seen, in the dimension, in the image of what your Soul has seen, on the string attached to the physicality. And now you bring the two images together, then you say, "Oh, in physicality is what actually I've seen, in the dimension of Energy." But don't forget, it has a problem. The problem is, brain of the man is physical. The Soul is aware of, inform the brain. Now physicality sees, it's a time delay. It's like when you speak on Earth and the guy listens on the moon. You have a time delay.

So what Soul sees in the dimension of his energy, physicality sees in the dimension of physicality. And then you say, "I've seen this before, it's like a deja vu." Why? Now you understand. The speed of dimension of the Universal energy is much, much stronger than the conversion in physical which creates a time delay. If you understand this, then you can use this knowledge in transmutation. You see you're in Coliseum, you see you are in whatever, (:26) and you see your body in another position, trust, bring, reverse the process to, call in, to transfer energy of the STP with you. The physicality will come but you always have a trace back as we saw in a ?? ladder, you're always connected.

The biggest problem is to transmute on this planet. The easiest problem is to transmute across the Universe. The reason being, is that in the physicality, you have to trust the physicality. In the energy, the connection you know is always connected to the point, which means you're always connected to DNA to an atmosphere, gravitational field of

the Earth. Your Soul trust, but your physicality doesn't. That's why 99% of you cannot transmute. When you do part of it, you're still connected to physicality. You see yourself doing something, but you're aware my physicality is here, my body is here.

I tell you a story that you might understand. I explained this before. Going through the life of the Soul. I lived in desert for hundreds of years. One tree and one water well. So the man crossed, so many men come and tap into the reserve of the water. Never saw me. They always saw an old man sitting by the well. He used to be called if you go to the history of the man of the Bedouins, (:28) they call you this story of the water well of the old man. I watched many come and go, over centuries. None ever understood where they are coming from, and none ever understood where they are going to. Even though I asked them, the only reference point they had was the city and the city destination. They never understood about the transmutation and their own Soul. Where did the Soul come from? And where the Soul is going to? I asked a question about the energy of the Creation. They answered in the dimension of physicality of the man.

Then it comes a point, you choose to move on. You choose to move to see when the time is right, is now I have to do, where we transfer the energy of the 'old man' in the dimension of physicality of a young child to manifest in dimension to complete what already another cycle of beginning has started that has to fulfilled by the child. Then comes what child does in physicality is not what in essence does the man in the Soul. If you understand this, you understand the process of transmutation and transportation and conversion.

So for you Knowledge Seekers that you're coming to this point is one thing is important. (:30) The point of the birth conversion from the energy to matter and matter to energy. That cry of birth. That evolution of the time cross. That singing of the owl. All is the same thing. All refers to one condition, but with different stories that you might understand it at different level of the comprehension.

In the systems of coming time when you go through these tests on Fridays, once a month, we push you to that dimension. In a way, the next 3 sessions is the carrot to get you moving. The carrot is that on the level of energy, you can have everything you want. Why do you attach yourself to dimension of physicality? Which then it needs to kill to destroy. I give you the energy of the carrot you create the image of the carrots in your brain, you receive the energy of the carrot you don't need to destroy it. You want a steak, I create that energy which hits your brain you get the image of the steak, you enjoy yourself with it, then you don't need to kill. (:32) But the biggest problem is in the future which we have to resolve, we know the solution, but you will have to do it. This is the time of transition. Even this carrot business in next three months is a transition, but if you don't learn it, you cannot go through the transmutation complete.

What does this mean? It means once you come to the transmutation, in the Universe the food has no taste. The food has no image. It's not a cow, it's not a carrot, it's not a steak, it's not a pie. For the time being, we have to push you along till you get the confidence that you can drive without holding to the handle, without needing a car, without needing

to put a fuel in it, which is your physicality, and the fuel of physicality, which is killing, to get. Where Universal Energy, you receive what you need, because the next creature doesn't look like a cow, which doesn't taste like a carrot, it does not need to be consumed, but its energy, is given and you are the possessor, you are possessor of love, which means, which means you give from the root of the essence of your Creation. Which means Mehran. Which means to give unconditionally with Love of the Creator. If you understand this, you can transmute. If you understand this, you can feed yourself. If you understand this, the process of the creation will become to you as clear as daylight.

When you transmute, leave the physicality, if you don't see first that light, it means you're still in the dimension of physicality. (:34) Man cries when he's born. Soul, when it transmutes due to conversion of the field energy in interaction with his environment, creates light. I am the light. Because the light is me, is the essence of the creation, confirmation of my existence in the realm of the Creator. I'm the only one who sees the light, and I still have the confirmation of the physicality.

You Knowledge Seekers need to step up, to understand, and bring that change. Live your beautiful life in physicality with your wife, your children and everything else. And understand what is, what can and how things can be. What does this mean to you? Does not necessarily mean anything to anybody else. You are used to dreaming and you are used to physical dimension and in that process none of you, in a way due to condition of the structure of the brain, this light never hardly you ever see. (:36) Because the brain has learned to deny it. So it doesn't exist. Because if you were in the physical dimension and then you go into the position of the different field strength of the body of the man and the energy. When the what we call, the energy expands to cover the totality of operation in the visual dimension and even the sound dimension, our brain has learned to in a way when it sees this clip it, it doesn't exist. Because we do this even during the day time. And when that clipping switch is not sequential and is not deleted, you call it déjà vu. If operates in the direction and dimension of the energy, it becomes part of your life.

And in a way, as I said, when you're crossing the road, it's the field energy of the Soul which pulls you back, says, "Oh, somebody pulled me." I said, no, it's your own energy field which does not follow your physicality. How many times come to you they say something is holding me back? That guy behind you, that guy who doesn't allow you to cross or something hold you back, is your Soul. And through the interaction of blocking in this, what we call, 'flashlights of conversion,' you feel it as something else. You call it 'premonition,' you have created so many words to justify our ignorance and not face the fact, (:38) the reality of the life that the two sides, the energy side and the physical side are the same.

Next time you come to this point, try to cross it. Try to follow, be aware in dimension of physicality, where the Soul takes you. Not what you want to do. Then you'll see, you find gradually ways to transmute, because now you are doing the job of the Soul. In way you're giving physical dimension to the action of the Soul. Don't do crazy things, don't go and jump off a cliff, but understand that process. We have to take you through this process. We have to teach you this. Many of you, you come on the teaching, will

understand and through the energy we create within your field of Universal dimension, you will connect to the body called physicality and then you become the teachers of the others through the same dimension of field strength. It's like we know we do not eat a fruit which is red in the jungle, it can kill (us), it has become part of our second part. Transmuting, transferring, trusting the energy of the STM has to become accepted, and accepted by the man, because it's not the second part, it's always been there, it's you who's been denying it.

It's very much like, as I said many time before, 30-40 years ago, (:40) when you used to walk on the street, people used to talk to themselves and make faces with themselves and raise their hands, (we) used to call them they're crazy. Now 80% of the population is crazy because you got the headphones in your ear and you're talking on a mobile phone, have you watched somebody when he talks mobile phone, the hand goes, the mouth goes, the shouting comes, so you already have accepted this new condition of what we call, mental condition, you all become crazy. We have accepted we have something in our ear and it brings the information and we convert it and we show all physical dimension to it, we even run, and nowadays they bring you these glasses that you think is so real that you jump off the table and break your leg, where you think is on the reality of the image.

In a way, mankind has been made ready for transmutation. By the carrots of the mobile phone, by the stake of the new eye units, and acceptance of the telephone in 1844, gradually we are giving you that carrot to believe that you don't need to have anything in your hand. Soon there'll be a little pin in your ear, you don't need even to carry the phone and then it goes with everything else as telephones in 1980s used to be the size of a briefcase, now is a pinhead, now we accepted it. Now we develop technologies which transfers energy in the energy of the Universe, that man can switch between the energy and the, what we call, physicality. (:42)

In a way, as I said, the 'carrot and the stick' is that, dimension and the system which we call it the Universal Matter Energies, which we have put in the market for you, many of you have obtained, bought it, it's going be going out in the next few weeks. This is a part process of that system. In the teaching of next two three months, we give you the 'carrots' as we said, it's a feeding, in introducing how to use tap to the energy of the Universe and with this what we call, Cosmic Ray Bottles, or what we call, the balls, in your hand we teach you the process of transmutation. If you had that disc with a hole in it, with that ball in the center of it (Nano Mirrors with hole in center), then you understand more about the World of Creation.

I use the 'carrots and stick,' you don't learn, we go back we do more, we come back we explain more, but the process of Creation has to come through the fields. Understanding by emotion and not by touching with the physicality, and emotion of what we call STP. With these new ?? balls, and the new technologies which we are putting into the system, we start the process of transmutation using Universal links, (:44) detached from dimension of physicality. The Gans's still hold you on to schizophrenic of the Universal Energy and the matter state. The what we call, Cosmic Dust which comes in the ball, is to connect you with the dimension of the fields of the Universe. There's a very interesting

point when you get these balls. Watch how the material disappears, you think I've lost most of it, and watch how it refills up again. You tap into, you take the energy, you use the reserve, you leave it, it will fill up because its characteristics, it fills up with the fields of the Universe which is needed and then you see, oh it was half full, today it's full.

These balls, if you manage to get two of them and hold them in a position and place them in a position, which we'll teach you as we come into it next year, will bring you to the dimension of the fields of the universe and a completion of the transmutation. You have to understand your two part of connections. physical dimension which is the nitrogen and oxygen (NO). your Universal connection which is a Hydrogen and Carbon (HC). And they have to be in balance with each other. (:46) When you increase one what energy goes, when you decrease one what energy comes in. And this creates the condition of the physical side, or transmutation side, or the Energy side.

In the coming weeks and in coming months slowly step by step I'll take you through this process. November session is beginning of that 'carrot.' Then the Universal balls after the new year is trying to connect you to tap into Universal Energies and understand how much you take. In a way the carrot, the steak, the meat, the milk is in that ball. How much you give to take, and how much you convert to in a way bring together. Within your own physicality or you let the physicality go to a new dimension. Understanding the World of Creation according to the man is not just his rocks, animals and stars. It is understanding what man does not see as anything, which is another 95% which is to you is all empty space, which is in fact is more energy there, than actually in the planetary system, in the stars and the galaxies, in the matter state observation of the man. (:48)

You have to understand the process of the light, you have to understand the process of the creation in the matter state, and the creation in the energy state, what we call, dimension of the World of the Creation. And then you come to understand the process of both is the same, but at different strength. And you have a transition line, which brings the 4 elements of the Creation manifestation together. And then it brings in the emotion, and then it brings in the Creation, then brings the Soul, And then for itself it brings you back to the world to the Creator. You got to understand as you have a physical dimension in the body of the man in the matter state side, you have a dimension of the Soul in the energy side, depending on Carbon 14 (C14) and depending on Carbon 60 (C60), which is the crystal structure manifestation of the strength of your Soul.

As you have a physical life, you have six foot two blue eyes, god knows what, black skin and the rest of it, you have a dimension inside in the Soul or universal energy side of your body. Because by existence of the Hydrogen (H) and C14, in the dimension of motion of its fields, which is the creation of its own C60, (:50) your Soul has a dimension and a field and a strength and a color. Which identifies you as you. Now that you not carry the dimension of physicality.

You got to understand, if man from planet Zeus sees your physical dimension, he will run. Never seen somebody with two legs, and two arms, and two eyes. But he sees the beauty of your C60 created by the strength of your Soul, which sees the beauty of it.

What it gives, and how much little it takes. Then to me you're a danger in the strength of the field, or to you me you're a friend because I cannot give you too much, I destroy myself, or as a friend I can give you as much as you like because I have more, I gather more.

So it comes to you as Knowledge Seekers, you are familiar with standing in front of the mirror to your physical dimensions. Now you have to find a mirror to see the beauty of the field strength of your Soul. And there is nothing more than the mirror of the Universe. Nothing more than interaction with another Soul to see your true strength. Am I always a taker because I'm still infant? Or am I given that I'm mature that I can support? I made man in the image of Myself. I have no physicality, but I feel and I live in the strength of the fields of the Universe. (:52) This is a dilemma for you Knowledge Seekers (KS) to sort out. I give you the stick and the carrots of the fruits and vegetables in next 2 or 3 months that you learn that energy can come. Then I drop you in the deep end in afternoon, what you call February, March in Universal field energy through the Cosmic Bundle Ray packages, the balls which many of you have taken. That this is the carrot and the stick of the physicality, that's the carrot and the stick of Universal Energy. That's how you transfer and how you transmute. How you create a dimension of the fields of your physicality. And what you see your Soul size and dimension will be will change your life in the dimension of physicality to strengthen, to increase is what we call, giving potential, or the love for the Creator.

Some of you when you mature to a point, you will use the world of physical, trying to elevate the STP and then the STM, which, you will understand you can do that, by taking energies of the Universe in one dimension through the STM, STP of the man, through the physicality of the man, to elevate the Soul itself. Now you understand, when you become that star, when your dimension is created by the interaction of the fields of Universal link of your body by Hydrogen and the C14, (:54) then you know your position in the Universe, then you know what you will create as children of the man in the dimension of the Soul in the Universe, where, how you will see the dream of the dream, that where my position will be, what I shall achieve and what I achieve is not to my expectation, I have to give more. So I abide by the rules in dimension of physicality to make a better, what I call, bulb. If you remember I explained about the tulips. Now when this bulb sits in another position, creates the most beautiful flower of the creation of the Creator. Image of an image, dream of a dream. But the reality in the dimension of the field of Universe.

In a way, go back to part of the teaching, I said, you care about your children, how they eat, how they get educated in the dimension of physicality. Now you become aware of the strength of field of your Soul, and you're there you how do you replenish how do you give it the strength that the children of your Soul which come creator of another cycle of life is in your hand in the dimension of physicality. How do you want those children to be? Children of man to kill or children of the Creator to give? And this is your dilemma. many of you will face this. And many of you will take a dimension of transition and transportation to bring that dimension. I use my physicality to take the energy from the Universe the purest way that, (:56) that allows me to feed my Soul, to become that

perfect condition that in creating the children of my Soul, I shall not commit no wrong. And I create the children which befits the Creator.

Now you understand, I have laid out the path to the teaching of the future today, and how you will be there, and many of you will follow, and be there to be completed. In this process, you understand how important it is to keep both sides pure and correct, one does not take from the other, and one does not give to the other that is too much, becomes the stagnation and the demise of the other.

In the process of coming times, you'll learn more about yourself, and how close you've been to your Soul, and how you denied that access, and how you can establish new lines of communication between in two sides, that you live perfect life. Maybe, maybe you can watch in dimension of physicality through a sense of the conversion of information, how your Soul, as you went to atom to see the atom (?? a KS went to see Athens), you see its position in the Universe, what it'll create and how beautiful the children of your Soul as a star, as a galaxy will become. You don't need to dream I have a house and I have children on this planet, you can see the reality of the dream of the field of the, what we call, the STM. And no one can interfere. (:58) There are no prophets, there are no gurus in this process. You are teachers, we show you, we teach you the path. It's you who have to decide. A physicist, a criminal, a president, and which one on each level, is stay correct to yourself. These are the title of the man, in the Universe there is only one title, the Creation and the created.

Understand the process and in the coming time I try to teach you, as I said I connected you to the path where you come. Now I laid out the program of the future of the Keshe Foundation, how step by step we bring that elevation. It's not just you Knowledge Seekers who listen, millions of people in the future will listen to the dimension of Soul and elevation of it, to the teaching of today and in past times, and gradually walk away from dimension of physical pain of the man.

As I said, it's your responsibility, you know it and you cannot deny it. How you reach it is your problem. Keshe Foundation is not to sell a pillow, a candle, soap and the rest, but it is how we can you keep you to understand the transfer of energies, how energies are transferred to your Soul, to your hand, to your eyes. Everything, knowingly or unknowingly, within the structure of the Keshe Foundation, is set to elevate your Soul and dimension of physicality. The pillow you buy from the Foundation, you put (your) head on it, elevates your Soul, elevates your physical dimension, is filled up with Gans's of that order. (1:00) The light you see as candle, is the light of the Creator, because we did it, we have placed the materials of the Creation, the field energy.

Now you understand. Step by step. We're taking you there, but you've been on this path for 4 billion years. To change it overnight is impossibilities, but gradually, gradually, step by step we'll get you there. I hope you understood the purpose of the teaching of today and I hope you understood more about your what I call, Twin energy part, and I hope you use it the correct way to elevate the strength of the fields of your own creation and

created. We go for a small break and when we come back, and hopefully we'll be able to enlighten you.

>> BREAK >> 562 KSW October 31, 2024 (1:07).

K- Thank you very much. A couple of announcements we have to make. We made the announcement that tomorrow we'll have the second addition to the, what we call, October Friday sessions. We had a number of Knowledge Seekers telling us that, tomorrow is the 1st of November and is, what we call, the day of remembrance of the dead. And many of them will not be available. So, we are shifting this Friday to next Friday. And I do apologize, we should have noticed that, being in Europe. (1:08) As you know on the 1st of November it's a National Holiday in many Countries in Europe, for remembrance of the dead. And we move this to next week, because many people go to cemeteries and churches and whatever. And so we do the session next week.

Regarding the Iranian conference, as you are aware of the situation, which is prevailing at the moment in Iran, we have to suspend the Iranian situation, at least till January, till we have a clear idea, how the Iranian position, and the situation in Middle East stays. The conference will be held, and if in January we cannot reach, we'll appoint a new country to replace Iran, which we hope it will not be done. In any case, we are working ahead and the situation is very critical, especially the next few days and we'll see what happens and how things take shape in Middle East.

In respect to the material which many of you, what we call, the Cosmic (Ray) materials, now the, what we call, the containment, the box is sorted. We expect the manufacturers to deliver, what we call, the boxes, that sometime in the next three or four weeks we'll start shipping these out, that they'll be there are most of you by the time before Christmas or around Christmas. Please when you receive these boxes, when you receive your ball, do not continuously work with it. Leave it in its box, the way it is, and when you need it to energize, (1:10) just open the box and leave. It'll find its own balance. I carried two of these materials in a container for a few weeks and I observed the changes, the energies and how they interacted with each other. When you receive these, please do not take

them as a toy. These are actually tools of the man next process of communication, transportation and transmutation. We teach you step by step what to do with them, as we go along, as you mature.

One point for most of the Knowledge Seekers to remember is, we are here to bring a new technology (T) and new knowledge and new insight. You're not here to make systems for electricity, or whatever even that's a carrot we carry you forward to the next step. And please be aware what you understood, what you understand and how much your understanding has changed from the time you came in touch with the Keshe Foundation. How much your Soul has elevated, how much your knowledge has increased. And then you'll understand there is a capability for every man in respect of the what we call, financial position or society position to elevate yourself. His own knowledge, his own understanding, about his own creation. And put these together in a way that it besuits and befits your Soul, not your physicality. If you have any questions we try to answer in, if I remember anything as usual, I jump out and tell you. (1:12)

<< Rick translate French question. >>

Q: ... (1:14) When I go to teach people how to make Gans, these people ask for two acres of farm. How can they, how close can the Gans be in the farm? If the Gans in the farm are kilometer apart, can the Gans still help this farm?

K- I think you, if you're French speak to our, what do you call it, French contingency in farming, and they can tell you how much you can go and how far. You can't put them kilometers apart, unless you have a special technology, and you don't use Gans's, which is a different technology, which is developed by Keshe Foundation. The, the dimension and the strength of the field is how much you, and what strength of the Gans you have produced, for what purpose. And if you put one drop on one kilometer and one another drop in another two kilometers away, they're still connected, (1:16) but the field strength of the connection is important, and if you don't have it, you can't establish it, it's not there.

We have shown this in test in China, in Mongolia, how the curvature of the field drops, from the field strength of the Gans, to what extent. Years ago, when we did a test in Mongolia. In the trials in Mongolia, we had a land of a hundred meter long. It was divided to three parts, more or less. This was where we introduced the Gans. And this part was when it was grown naturally. 33 meters apart, roughly. 20 meter length on this way. This is known as one mole, 660 square meter in Chinese, everything is measured in mole. We watered, Gans water was given to this part. What we saw was production this level and it didn't drop by the edge where we did in water, it carried on, carried on to the point here. This showed us, because we measured the harvest on both ends, the harvest even though you're not using Gans's in this area, the field still transfers across. (1:18)

So, if you take a land and you put a Gans in this corner, and you harvest, you put another Gans from the other end, there will be a connection. But, again, it's a field difference and a material difference, and the change is not that big. The new technology we developed is

actually. We do not deal with this process, we deal with what we call the amino acid of the, what you call, the seed, the plant. And it's a totally different technology, different understanding, and the harvest is totally different. The energy you get from the harvest and the emotion you get from that new way of harvesting is very, very different. And you cannot put it by the answer of kilometer or meter you can put that the maximum range you get with watering is a few meters, if that.

Any other question?

Would you like to change the screen? I hope I've answered this question.

If you want more about farming and especially here in France, we have the Knowledge Seekers, who work at center in Agriculture in France, get in touch with them and they can guide you, that you do it the right way. (1:20)

Any other questions?

Q: Okay, thank you. Let's see here. We have a number of questions from Claudia, from her community, with the Brazilian community.

K- Yeah, I think they sit and just create questions only.

R: Well, they do produce them, so... she is somebody who ponders life, and does get involved with the questions. One question she had, I don't know if it was directly from her, or from one of her people.

Q: ... What can we do with Tritium?

K- Not much you can do, but we can do a lot with. But, again Tritium is in the energy level, and Tritium in the Gans level, and as a matter state. Each one has totally different properties and application. Tritium in nuclear is highly radioactive. Tritium in Gans technology is an energy source, but you have to know how to use it. It needs a deep understanding of nuclear physics. And in the other hand, Tritium for other applications like transmutation, transportation, it is a technology which is not in the hand of the mankind today. Not which you can do, you can just produce it, (1:22) but ... If you manage to produce Tritium as radiation, as massive radiation, then you'll reach a breakthrough in the World of Creation. We do that in our lab, we create Tritium condition as a field, we are good at it, we know exactly what we do, and we use it for specific applications.

R: What about the Tritium that has come from the Fukushima reactors, that there's still a... (K: These are radioactive). They stockpiled, they stock... they had these huge tanks, and hundreds of them, they stockpiled the high Tritium water. Now, it seems to me that if you had a big container of Tritium water like that, you would do something useful with it, rather than release it into the ocean. Could, could you not create a small reactor, and use the Tritium energy, from that water, and be able to make it safe, at the same time?

K- That is a technology, needs to be understood, that actually has been discussed by our team in the past 24 hours. In a way, because the Tritium in Fukushima is not the Tritium, it's just a game played at the moment, because they have to play that game. It's getting continuously replenished, even with the other bits getting done, it creates white Nano gold for the Japanese Royal Family in the stock of the, what we call, Japanese, American, reserve. (1:24) They know how to do it, technology was given to them and then converted to an American organization in California, and so they know what to do with it. If you use as a Nano Gans gold, it has a lot of applications, but these people are not aware of it. They just collect it, because it's worth millions of dollars a gram.

But in essence, these waters in Fukushima, why are they... why haven't they added any more tanks to it, after the first batch at 1,400? Reactors were still running. And the material was getting more and more produced, what happened to it? You just got to think what (news) they give you. These tanks once we gave them the conversion, are still getting used to produce this material, but they don't know what to do with it. It's... sometime you... we haven't seen this 1,400 become 2,800 after, 2014, 13, 14 when we got involved with it, it stayed at 1,400. But the reactors, problem with the reactors, carried on. They still have this ?? , where is it going to? They don't all feed it back straight away. They feed that, these materials into these tanks, convert it, and, as it's a clear water, they don't even need to declare it to anyone, because it's pure water going out, and it's always there. So, it gets used but converted but they don't know how to use it.

Sometimes when you see things in the news you hear just use the level of your common sense and your understanding. If within the first few months they kept on building 1,400 each one holds 400,000, suddenly why did they stop? (1:26) Why they're (not) building any more of these, and they don't release any material into the sea? But the reactors are still running, they've been running since 2014. They just feed it up, convert it, clean water, nobody complains, then they found a way to put it into rivers. Because it has no radioactive contamination. We haven't seen any increase in the 1,400 tanks which was built at the time, every time, every week, they had to build, and build two or three to catch up. What happened if they stop. And we don't see three, four, or five thousand of these tanks across Fukushima. He stopped, because now they use those tanks for the conversion (to white gold), but the reactors never stop producing overnight, and then, what you call it, Tritium and the rest of it.

We opened the door of knowledge and you know how governments cheat. And what is in the hand of position (possession) of them. You ask yourself a simple question. How come in the first two years, on Fukushima, maybe three years, we built fourteen hundred and suddenly it stopped from the time Keshe Foundation got involved? The reactors haven't stopped producing, the damage didn't repair. You cannot stop water going into the fuel rods, because otherwise you have another explosion and meltdown. So, what happened? And why did they stop at 1,400?

Next question.

Q: ... Is there a structure or device to measure the plasma fields? (1:28)

K- Yes, but you need to create another plasma to understand it, to be able to measure the dimension of it, the fields of it, the strength of it. And how you create it. And what field it creates and how it manifests itself.

We saw this clearly, in the past 4 weeks. Keshe Foundation technology was clearly used by the Iranian government on horizons of the Tel Aviv. Let me explain to you, and then you see the measure of the fields. You can go on the Internet and watch this video, or, if I can share with you some photos which we noticed as the... as attack was taking place, was observing, the position of the lights and everything else, and now somebody has put it on the Internet, so we can speak about it. And then you see how the technology has changed, and how the technology changes. I show you a sequence, which is important, to understand the sequence. And then, I show you other pictures with it. I'll send a link to Rick, but I don't know if you can show it or not.

R: Do you want me to show that image?

K- No, I'm showing it. I put the image up now. I think you can...

R: I cut out the image if you want that.

K- Yeah, it's okay. I show you this. If you see, this light suddenly appeared on the, what you call, the skies of Tel Aviv, on the 1st of October. Few second later, this light appears, two of them. (1:30) You can see the horizon, Tel Aviv burning, in the background. Those lights in the back, in the front you see the city, in the background is where, literally the city was in a fire. A few second later, we saw the 3 lights, Star Formation (SF). These 3 lights took their position. These are Keshe Foundation Space Development Technology, Iranian military calls with the 'light system.' They move into action and see what happens. You see the lights, dotted lights, these are anti-aircraft, or what you call, anti-missile, defense technology of Israel. You see the gap. (I don't know if I can write on it, I don't know if I can). You see there is a gap between the main light and the first light. And cannot go any closer. And we saw how all these lights literally buried, disappeared, they never got real to this. You see them again here. In the second picture.

They created a field. And now you see they increase their fields, that they don't come any closer. You see the gap between the first and the second picture. This is the first time ever, Keshe Foundation Plasma Technology, is shown by the Iranian scientists in creating Magnetic fields shielding. Militarily wise, I'll explain to you in the future, why they were employed for the first time. (1:32) This is the fear of the West. This is the technology which, for the first time, Iran warned about technology they have in their hand. And this is why we saw this horizon in Tel Aviv. All the anti-aircraft, all the anti-missile system, all the dome was, all whatever they shot at was observed, even they use X-ray laser beam, they were diverted. And, this is what we saw, what Israelis claim to be, so safe, there was no 'Iron Dome.' And since this time we've seen Hezbollah has had a lot of success hitting Northern Israel and the rest of it.

I have advice and I have recommended to the Ayatollah Khomeini of Iran and Iranian government, instead of going for war, open this technology this week to the world public and create peace with it. This technology is extremely advanced and belongs to Keshe Foundation, we developed it in Iran. You can see the distance. If you watch the video of this, you see exactly the shielding. The distance these things cannot... As they come near to the certain point they just disappear.

If we go with this technology, nuclear warheads, everything else is obsolete. (1:34) I have requested the Ayatollah Khomeini of Iran in the past few hours to stop the war and release the technology. We have shown it, we are not talking about, we're going to show it. You see the fire on the ground, the bases of the Israeli army on fire. This is the lights you see in the background and we have so detailed. You got to remember, as I said to the Iranians, Israelis show satellite figures from Americans what they hit. They don't show the satellite figures of the ground which was wiped out on the 1st of October. A wife does not leave a husband if he could secure the wife. Netanyahu wife has left Israel this week because he cannot secure his nation and his wife is leaving.

If Iran decides to go for retaliation of the 26, we will achieve a lot. We'll destroy half of the forces, maybe hundreds of thousands of the Israelis with the Palestinians who live in Israel, or we open the door of the knowledge, and show, as you see, the Star Formation, on the horizon of Tel Aviv, 30 days ago. I especially kept this away from public. You go and see the videos on the Internet, you see the live of this, how these antimissiles never reach and they just disappear, depending on the fields and how the two system adjust itself. How you increase distance between the Star Formation. (1:36)

Now, for the first time you see the beauty of a technology, which in the way we developed it to stop meteorites and the rest to come to planet Earth, to endanger us, or in high speed travel to keep us protected. These are not made up images. These are the images which the Israelis posted on their own Internet and it was banned immediately, that Iran possesses the most advanced technology. This is the reason when I told you I had 80% of the answer we are still there.

And then you have to understand the process of the Technology can be used for peace and for Iraq to open his technology worldwide, immediately. We are the owners of the technology as Keshe Foundation and you are part of it. And now you see the beauty of it. There is a restriction on Youtube, if Rick checks, and can bring some... A few people have put this up on the Internet, in different form, in their chats. If we don't break the law, there is actually live transmission of it by CNN. You see how this barge of the, what you call, missiles disappear, in the... within a vicinity, it never reaches it. Gravitational Magnetic field, interaction of the field with the atmosphere, create light.

You wanted to see the application of the Keshe Foundation was shown in strength. First of October 2024. More or less, more or less, about a week here and there. (1:38) Just about 16 years after technology was transferred to Iran and left Iran in 2008. You see a Star Formation is beauty and it's power to stop the latest weapon technology and we've

seen how this has brought the gap. The Iron Dome has become rusted and penetrable. As I said, we know the collaboration between the West and Israel, they are no match to this technology. You all are familiar with this. Now we see the Star Formation on the horizons of the Tel Aviv.

So what will be the future in the next few days is how Ayatollah Khomeini of Iran will take our advice and open the technology worldwide and divert the whole war into a new technology dimension. This has a lot of application, this has a lot of implication, this makes nuclear weapon obsolete, this makes the most latest defense technology of Americans and Israelis, all obsolete. And don't forget, in this day, on the 1st of October, using this technology, (1:40) the whole defense technology of the Israel, the Iron Dome broke down, that they had to go to American and ask for THAAK system. That needs hundred Americans to be there, to do it, to safeguard Israel and even with that they brought in, Hamas is by-passing and we've seen hundreds of Israeli soldiers were killed in the past two or three days. Because the Dome system control through instruction of this new technology has brought an end to the most sophisticated systems they ever thought they had. As I said to one of the Knowledge Seekers, on the 1st of October the technology showed its power, its beauty, that no advanced technology is needed. The Space has become open to man, and how we do it, and has made the latest weapon technology of the Americans, and the Israelis, and the rest, obsolete.

You got to realize, a thief is a thief by nature. The Americans are bringing this THAAK system with ?? to Israel, they brought two or three systems of it to protect it, and they find it is obsolete, because it's literally bypasses by this system, whenever they are used. But, they stole this technology from the Americans, and they try to say it's theirs, but when it got obsolete, they go to the Americans, and Americans find out with their system, are obsolete. But the most interesting thing is this is, Israelis can put out S-300, which is the Russian defense technology, which is given to you. (1:42) And the Iranians with this technology can obsolete the American defense technology. So, what's the use of fighting? What's the use of all this mayhem? And I'm recommending Ayatollah Khomeini of Iran, in the past few hours to open the technology and change the course.

I know his eminence Ayatollah Khomeini of Iran and his team are on the line and listening. With this technology we do not need to attack, we need to bring shame to the knowledge of weapon technology when the beauty of this can be shown. And if you understand it, this is 3 different vehicles is not just one. So it means technology is repeatable and needs to be kept in the formation to create that dome. You know in the Star Formation you create a spherical dome so is this. And this is what is important to us as Knowledge Seekers. And if the world scientists understand what happened on the what we call, 1st of October 2024 from the skies of Tel Aviv, many of you will stop the war. It's very simple, you see the distance and you see how they become impossible to penetrate and you can create the dome. (1:44) And Ayatollah Khamenei in the past 24 or 48 hours has said Iran will release the technology will change the course. There'll be the weapon technology of this technology. I know their capability and I have requested to step back and to open the technology to bring shame to the Americans and Israelis. We

can take you out in one second. And it's not a talk, this is the horizon, skies of Tel Aviv, on the 1st of October 2024.

To strangers, they're just lights, to you Knowledge Seekers, it's a Star Formation. They didn't appear on the line next to each other, they didn't appear in a circle. They completed a Star Formation which needed to create a dome to allow intercepted missiles to arrive in Tel Aviv and do their job. And they can create hole in them when they feel like it. That's what you see in the bottom. Estimated losses by the Israeli armies is in thousands, that's why it is censored.

Now, Now, you wanted to see the technology. I kept this pictures, this images from CNN, from the World News, showing it live during the attack. And now that it's become public, you can see that it's not from us. (1:46) The technology is delivered, is the leaders who have to apply it for peace, or for destruction. Hours before teaching this morning, I put my case to Ayatollah Khamenei directly. I don't advise to attack. I don't advise to get defeated. I advise to open a new technology, that we don't need to talk about it, because we have already shown its power.

We got to realize even this technology, which you see in the skies of Tel Aviv is obsolete to the advancement of the technology in Keshe Foundation today. So, now sits in the hand of Ayatollah Khamenei of Iran. We go from one line to two or to three and we show no weapon can stand. It serves its purpose and it was created to stop meteorites, asteroids to hit Earth or in time of trouble for man. And Iran uses it to stop, create that hole, that allows, the mayhem on the horizons of Tel Aviv. As I said, a woman leaves a man, when he cannot secure the safety of the woman. And Sara has left Tel Aviv. (1:48) Because (her) man cannot secure his nation, there is no guarantee. Because they know what was on the horizon.

Any other question?

Q: ... Thank you, Rick. Good morning, Mr. Keshe. That was very beautiful news. Thank you, Mr. Keshe. And as a Knowledge Seeker, that's been awaiting the technology to be released for a very long time. It's beautiful to see this on the screen. That the capability, we always knew the capabilities, but it's beautiful to see that the knowledge is now being shared that there's no denying it anymore, and that's the real beauty of it. So we have to go forward. And we know now that the Iranians and the world will have to take a new position in this very moment. Mr. Keshe, talking about the wars here, with those with that Star Formation being in position or has been in position. How does that change the actual emotions of the people that were underneath it, or around it will it affect them?

K- This has a certain limitation of the field transfer and it's built for a different purpose. If you use the same structure and same, but different loading, you can feed the nation. People underneath Tel Aviv could be changed not to feel hungry, change their emotion. (1:50) Yes, it can be done. It's the purpose of it.

Q: So I was part of the transmutation test a couple of weeks ago, and I experienced some things like remote viewing and a few other things. And then I came out of this, this situation, and I suddenly was back into physicality, very awake and sat up and thought, "Oh!" and I thought I need to go back. And then I remembered to put a MaGrav I had and I put it underneath the bed, and then I led with the MaGrav underneath me. I experienced something totally different that I wasn't expecting. And I don't know if you want me to disclose this in the open now, but it wasn't what I was expecting.

K- Ok, you explain. You come this far, you better jump the cliff.

Q: Okay. So it was, it felt to me or I was very, very, you know, when you're in a dream or you're present, I was very, very present. And I was with a group of, I presume they were men, walking up some stairs in a building and they all had green army suits on and helmets and I think a couple of them had some sort of something in their hands I don't know what it was. And I was behind them walking up the stairs with them and then but it was very I was there in the moment and I just I didn't know why this would take position at that you know at that moment. Because I wasn't expecting to be thrown in... it was... it didn't feel like it was... I'm not sure where it was, to be honest, I'm not sure where I was. But it wasn't something I was expecting, that's for sure.

K- Yeah, but then you've got to realize, you know, it depends what field you create around you. (1:52) And especially with the Cosmic materials which now we're releasing, you create the dimension of the Space. With MaGravs you create dimension of matter state, because you are in the field of the materials. Then, you have to understand in what fields you are connected with. What you connected with. And is this something you wanted to, or is something it came to you. This is why in the coming time when you think you want to be for example in New York from where you are now, because you set the destination is where you want the Soul be the Soul is there to satisfy the emotion of the physicality. And this is how you learn gradually to transfer or transmute.

It's very simple. I explain this. I'll try to explain more in a simpler way. You stand on the line. You see it in races on the racetracks, on the athletic racetracks. And you are forced to run, or look at the same line, you are forced to walk or walk faster, or do a fast run or fast walk. Or you try to jump from that line running to jump. So you decide in your head or the person or we do when I take the next step towards where I want to go, I run, I walk, I jump, I whatever, get in the car or whatever. (1:54) Because I know the destination I decide how to go there. You go out of the house we're going to the shopping center, you say to the wife, "I walk." She says, "I take the car." The child says, "I take the bicycle." But, because we all know the shopping center is the destination, we all end up there and we see each other. Somebody has to wait, the wife took it five minutes to get there, the bicycle takes 10 minutes, you walking in half an hour, but they all hang around there till daddy arrives, but destination is known. Because you've decided, and you targeted, and you achieved it.

It's the same when it comes to transmutation. You decide their location, then you decide, I go physically with a car, or I go through transmutation, transferring the energy of my

physicality into my Soul, or physicality to my Soul, I'll be there. In a way you'll be there instantaneously waiting for the wife to arrive in five minutes. And this is how you will learn to know where you are, and these people you say I don't know they were green or, you learn through energy of the Soul in the dimension of the what you understand as English, it could be Chinese guy or whatever, to interact to clarify who you are, where you are, who these people are. And then bring it back to the translator, converter, what I call the brain, and this guy says "oh I'm from planet Zeus" and this and that.

So you next time gradually as we come to the transmutation material, especially to the disc with the hole in it, especially with the Glasses. (1:56) We'll bring all these technologies together. The Glasses are visualization. The Headphone is for energy transfer of your Soul, conversion of opening. The poles are there to bring the energy of the Universe to you, then in a way that 80% of you waiting to come is there. How you direct it, how you feed the Soul or you feed the physicality. I hold the balls in my hand but nothing happens. Have you asked your Soul? Does not see your physicality ready to see the beauty on the energy it receives? And This is the process we gradually have to bring.

When you receive these Cosmic material in the bowl with you in the next few weeks, don't play with them unless you are really ready to see the beauty of the Creator. These are not jokes. These are not game play. Come together, they are like the egg and sperm, each one in one hand. Then we show you how to bring the end, it doesn't come by holding your hands. It's a specific way we transfer their energy, and then you understand the whole process of transmutation.

Q: Mr. Keshe, can I... Sorry, thank you for that. So I wanted to clarify something. So that when I saw those people, I felt with those people, I've been looking at the war situation and following it like many people on planet Earth. And I feel a deep sadness and shame for humanity that we're still doing this. And I felt it very, very powerfully in my body. (1:58) And so I was connecting with it. And then when I went on the second phase, went through the MaGrav, I connected with this military operation or something like this. I'm not sure what it was, but I really didn't want to be part of this. I would never do such a thing. And I'm not sure what it was. But when I went the first phase, when I was happily just holding two Gans's in my hand, as you said, And I placed the MaGrav beside me with a jar of, I think it was CO2, on top that was linked to the others. That was a more happy place, and it didn't... it may have been planet Earth, but it seemed like it was more than that. I had many different remote viewing situations of all sorts of things, you know, countless numbers. So, it's really, sometimes do we control the focus? Or is it something that, you know, you're unaware of? It's a subconscious that's actually guiding you or positioning you. How does that... how does that work?

K- It's your Soul and your emotion. It's... you have to understand and, in a way, distinguish between the emotion of the Soul, and the emotion of STP, and emotion of the, the what I call, the interaction of the two. In the emotion of STP we cry, or we shout, or we laugh, or whatever, in the dimension of the STP and the STM, we take different dimension of strength.

It is very interesting, And I'm sure every single one of us has had this feeling somewhere in our lifetime. We cross the street, we sit next to people, (2:00) we touch each other in deliberate, or a un-deliberate way, and it's just a touch, but somebody touches us, stranger or a friend, a lover or whatever, and that touch, single skin touch or look which is energy itself, creates a mayhem within us emotionally. Emotion of love, emotion of belonging, emotion of fear, and it's just that touch, skin touch, reaction and interaction of that touch. That is the emotion of physicality, in interaction with the STP. Then, if you understand this, which all of you are, we have felt a woman, a man we love, just touches us and the whole body goes into shivers and shakes. We hold just our child and the whole world changes. Is not another meter away, everything is in what we wanted. Just touching and holding our child.

Now if you understand this, try to understand what I call the shake hand, the touch of the fields of the STP with the STM, which can create the same kind of emotion, and God help you if you ever feel that emotion. And if it's in the level of giving from the Soul to the STP it'll change your life. (2:02) The emotion it creates is so powerful that nothing on this planet worth living for.

So is the sensation in which dimension and what strength it comes to. And how you hold and what you expected and what you receive. I spoke before about my granddaughters. I always been a father. I hold my son's my arm my world is complete. But when I held my granddaughter for the first time the feel, the emotion was overwhelming. It was more than I ever could give or take from my children. And that emotion I always felt is emotion of the Soul, because I have no physical connection to. I'm the grandfather but in that few days, few weeks of life of this young child, dimension is different. My love for my children is on the dimension of the physical, STP, physicality, I gave life to them. With this little life is totally different, it is emotion of the Souls. Physicality has nothing to do with it. (2:04) And this is what we have to feel, the emotion of the Soul.

And if we mature to this, then when it comes to the children of Mitra, when you hug them, you hug the Soul of the Creator and that brings a different dimension of emotion. Then you ask yourself question do I want the dimension of physicality or do I want a higher order emotion which I never knew. So you have to learn how to target, you have to learn how to understand yourself, your dimension of the fields, and what was my intention that you brought me, or has this brought me to enlighten me to understand? When you say you saw soldiers or whatever, people in green, was this a prelude to bring you to a new dimension, to see another type of life, but for you, converts into arms and legs, because this way how you know creatures, they are things who have intelligence.

There is something important, why we as humans, most of the dreams we have, or what we call, Transmutation through our Soul we have, we see shapes and lives with very much humanoid structure. Because in our brain, we have put a filter, that anything which has a structure and intelligence has to be man looking. (2:06) And we'll have intelligence, which will talk and everything else. And this is part of the problems our evolution and not understanding the power of our Soul. We don't expect to see a dog

talking and being running an aircraft, or being a passenger of the Universe and the rest of it. Because to our filtering system in our STP, in physicality this thing cannot be. So, we give them image of a man, that we understand they have intelligence, then they... they walk and they are talking, even though in reality they just could be a field. Perception by conversion of information.

So, the green man, the man you saw in the uniform, were actually is a man or your brain converted because then you understand you can talk to them, they have intelligence and they do something? Watch children cartoon and see how the dog is a fire fighter, and a dog is a rescuer, and a dog is a president. And watch another cartoon where a cat does the same thing. Children have no perception of you have to have a body of a man, to have intellect to run a power station, or run a fire engine and the rest. They accept it because we have not formed them to the shape of the man. And this is the whole beauty with the what I call tele-transportation communication line of the field strength of the AA of the man and nothing else. (2:08) If you could change the field strength of your AA you might see the same green men in a different shape and color, and not in a human form. This is one of the biggest points that why most of the lives you see with intelligence you tend to get them to look like a man, and have a leg, arm and eyes. It's the filter you have created over billions of years, for conversion of the Energy side, to matter state, that you can make sense of it. It takes time, but man gradually will learn it.

Q: Thank you Mr. Keshe, I totally understand what you're saying there. And, one thing I'd love... I always wanted to ask you a question. What is the question you would like a government or a man or a woman, someone to ask you that would really, that you need to express and to show?

K- What do you mean?

Q: What is the one question maybe from somebody within humanity who holds a position, would come to you and ask you Mehran, and would ask you, um... for peace on planet Earth, or peace within man. A question that would, um, open everything up. Is there a question that you would like asked from us?

K- Not really, it's just... I always say, my asking is, when man will mature? (2:10) As you know, in past few weeks, more or less, my time is spending trying to bring something to, what you call, world leaders in different ways. I spend time with ambassadors and embassies and diplomats and politicians. In past few weeks, I've traveled God knows where and what. To make a sense or bring a sense to world leaders or the governments. And it's amazing how they shy away. How they shy away. And I asked in a very different way. I showed all the pros and cons of taking this step to go to war. Or, bring a technology which can change the dimension of the war. And, as I said, we hope for the enlightenment for Ayatollah Khamenei of Iran. He's the only one. It's literally head to head. My wishes and his physical reaction. There's nobody in between. And would he bring the wisdom of knowledge to religion? Because you have to understand, you see a Star Formation in the skies of Tel Aviv. Once you go out with this

and show and man starts understanding the next step in science and technology, then it comes, is there a place for religion? (2:12)

If they go to the extent of the knowledge which we have taught in past years, then it comes their position and their position. We show this. (I have to go somewhere and get you a picture which I ask Rick then to share it with you or put them next to each other. Give me a few seconds, if I can find that picture). This goes to President Biden and American administration. If I can find this picture and explain to you in a very, very simple way. 25,000 pictures. It's important to bring a sense to this. Let me cancel. If you go, I don't know if Rick can do it because I have the pictures here.

<< Mr. Keshe search for the pictures >> (2:14)

Oh, yeah, I found it. These are exactly what you see in the skies of Tel Aviv, is exactly what Americans on the back of the Keshe Foundation, what we call, Star Formation, have put application in European, American patent. And, they want us to accept as something different. Rick, I've put two pictures up, up if you can bring them next to each other. And then you bring it into, what do you call it, into Zoom. (2:16)

I want you to see a reality and a dream. This is the dream of American, you see in the bottom picture, on a stolen patent technology of the Keshe Foundation, submitted by American Navy in 2020 to create such a technology. And this is the reality of the same thing on the horizon of Tel Aviv on 1st October. Iran has achieved American's dream. Why can't we use this knowledge to stop what sits at the bottom of this picture, where thousands and thousands of Israelis got killed? The third of Israeli Air Force literally got wiped out, with pilots inside the plane. You do not want me to release the facts what happened on 1st of October to Israel. A wife doesn't fled, if she doesn't know this is what they're going to do to her. You're crazy enough, you stay, I'm going. (2:18) This is a difference, this is the reality. And this is a dream of a nation, who always likes to create conflict. And they have submitted a patent for it. Where there is no patent for it, it's already in the skies.

And this is where my request came and I put it directly to Ayatollah Khamenei this morning before the teaching. Let's go for the science and abandon war. If the Iranian government decides to show this technology online with the presence of Ayatollah Khamenei, nobody else. This will tell the Americans, "Do you want us to fight with us? Isn't this what happened to you on the skies of Tel Aviv 30 days ago? Or are we going to play the child game of weapon technology and dreaming what could be like this?" This is from the patent of Mr. ?? Pius, the American thief. You go and see his patent, he shows you a full, what you call it, Star Formation in his patent.

Q: Mr. Keshe, haven't these ... these ... what you've just shown on screen, haven't they been around for some time now? I've... I mean, many people have reported, that they've been around for a long time.

K- If you've been to Isfahan, some Japanese a few years ago, recorded actually the craft on flight. We don't know how it happened. It was not supposed to be there. (2:20) It happened to be there. And some Japanese tourists in Isfahan, because Isfahan is a point of flight systems of Iran. We have different tests areas. And that was one of the reasons we chose Isfahan, for the demonstration of the flight system, because the technology is already there.

But, let's see how it takes shapes, but yes, it's been in, Iran has shown this, it's the first time. For weeks they've been telling me, we have a technology, the light technology, and I said to them, "This technology is mine, you took it from me, you developed it, so let's bring it out." I wonder which side Ayatollah Khamenei decides. And, there's a big gap, what we call, the dream and the reality. That's why American, Israelis and the West has to deny this, because they're so far behind in technology. They're extremely behind in technology. So they have to deny it doesn't exist, because then he allows us to go into war.

Q: Mr. Keshe are they... what we're looking on screen, are they non-tangible or tangible?

K- Man powered. Controlled.

Q: Would that have a Soul? (2:22)

K- Of course it has. The structure of this technology is beyond understanding. It's not beyond, it's just if you deny it, you can do whatever you've done up to now. You got to understand why the Americans are in this, what you call it, denial position, and covering everything up. Because, if you have it, we don't have it, where does our superiority comes? How can we call us, ourselves, a superior nation, when we actually are far beyond in technology? And this is the problem, this is... I was with a diplomat, a couple of days ago. He came into the meeting, with half uniform, of course military, and when I finished talking to him, he walked out, maybe, a meter shorter than what he came in for. And, in the discussion, I explained to him, clearly, where we stand, scientifically, and what we want from his government. He said, "Mr. Keshe, can I have your email?" I said, "There it is," I gave him my phone, I said, "I know who you are." write yourself an email. (2:24) And, it's interesting how the bigger claim they make in who they are, the harder it is for them to accept the, what you call it, the reality about their, what I call, weakness or lack of understanding. And this sits with all of them, without fail. We cannot change it. This is the way they are. It's the way they structure their brain and they see themselves as superior and nobody else can have better than us, so everything else is wrong and is denied. So the fact does not change.

Q: Mr. Keshe you say it's the Americans, but is it the Americans, is it everybody that's connected with this, it's and it all leads back to theology in the end? Is this nothing's changed?

K- It's the persona which they have created. It's not this, it's no difference. I tell you something it's the same with the Chinese. I was meeting some time ago with a very close

relative more or less direct line to President Xi for dinner and we have a long term six, seven years of connection, we meet regular basis in Beijing. Because he conveys my thinking to the President of China. And those of you who are around me, they know how I communicate. I have different systems of communication with different countries.

(2:26) We were invited to his private house and out of politeness and because we discussed some really detailed, political, diplomatic, and whatever, Chinese government structure. I left my telephone bag downstairs, out of secrecy or whatever, being safe. Was the same with his entourage. I think about 10 to 15 of us on the dinner table as you've seen the Chinese way you've seen around the circle and we share everything. After about 2-3 hours of dinner, it was a beautiful time.

When I came down and I took my telephone back, later on I said to the National Security of the Chinese government, "Why did you go through my phones?" "Whenever we do." They denied, they said, "This is not what they do." "This is not the way the Chinese operate, this is an insult." I said to them that, "This is not an insult." "This is how you have done and you have gone into my telephone, while was in your possession downstairs." It brought a lot of harshness. It brought a lot of... what you call it, not a good feeling. That they did not do so. Interesting enough, (2:28) I had to go through my files, and I noticed every picture taken with him, his office, his officers, and dinners, we had many times dinners together, every time pictures were taken as a memorial, with a United Nation, African United Nation ambassador with us, all have been deleted. I went through all the files, and I thought that's crazy, why no other pictures except all, maybe for 30-40 pictures with him, with what you call it, the very high level officials of Chinese government, all been deleted, and they didn't deny doing it.

Strange enough, they don't know, all my phones gets backed up on regular basis. I went to the hard disks and they're all there. And it gave me a very interesting insight. Why do governments, why do people go to the extent to do things like this? To deny the future presence, to deny the feebleness, to deny whatever else. And I said to Chinese security people, later on, I will publish these pictures one day. (2:30) You should have never gone to my phone, you should have never deleted your phone, my pictures. These are historical and they are important for the future for people. When the Keshe Foundation comes out of the hands of the Fox (News), to be foxed. So Americans do the same as the Chinese do, the Chinese do the same as the Iranians do. They fight things that does not suit them, or they destroy things that they do not suit them. And it's the same with all of them, it's power. Losing power, or denying for themselves not to have the power. Or, in the future, being pointed out, you were in a position, why didn't you do something about it?

It's very interesting if you study culture of, what's going on around Keshe Foundation. Iran, as you see on the picture, has developed it, and denies it, uses it. Americans dream about it, and then they deny the Keshe Foundation. Chinese have it, but they still steal it, and they still deny the technology works. Denial in three different direction. And, interesting enough, we still carry on teaching. As I always said, a father never looks on the behavior of the children, the love of the father never changes for a child. And it does not matter which one of the children. (2:32) You just give love and you nourish and one

day they become wise. And that's all we do. And that's all our job is to do, without expectation.

The strength, the depth of you, blocking Keshe Foundation, in every way and dimension, is so extensive, that the denial will bite them very soon. what you see on the screen. 15 years of research since 2008 has gone for you to see the lights on the horizon of Tel Aviv. Why should it go and disappear if Iran goes into war, where it can become a stepping-stone and change the life of man. You all know what this Star Formation can do, can create transportation with the speed of light beyond imagination.

You go into the actual video of this, these lights, the way they come. They come on one by one, they disappear, the pier, one by one. And the Israelis shoot at the light because they cannot have a physical connection on the radar. That's what you see comes out in anti-aircraft missiles, anti-missile. These, each one of these lights you see as a spec where I showed before each one cost tens of thousands of dollars to shoot in there. (2:34) When you see these anti-missiles each one is thousands of dollars going into sky coming down with nothing. That barrage of what you see these are not anti aircraft these are anti missiles each are all hundreds of thousands setup. And it's still worth nothing in front of the machine it just slides off like nothing. It needs maturity of our world leaders to understand.

Any other question?

Q: Mr. Keshe. Sorry if I'm allowed to ask one more question Mr. Keshe. So when people do these things, we know on another level, on the Soul level, that they are re-balancing themselves and there's always a balanced position where you have to pay back for an interaction, and action, a thought, a deed, whatever it is. And by deleting something, does that change their position on a Soul level that ultimately all of this is going to be part of, they're part of the totality, and they are in a field of interactions and they are maneuvering something that they shouldn't do. How does that affect them? How does that affect them personally on a Soul level?

K- They've done this so many, so often, that they don't consider it at all affecting them. But in a way, it does. It's the line of communication. It's what brings out. It's what it shows, (2:36) and how they end up in their lives and the way they are in their living. It's for them to see and it happens so often that to them is irrelevant, does not... they do not consider it, they just see there's something I can do, I have the power of.

Q: They're affecting many, many different physicality's and Souls Mr. Keshe, and we all have to interact.

K- Yes, you see, we always have to interact, something happens. You... you look at the Palestine. 40,000 have died, 1/3 children. Let's say one third of these children's parents will survive. For the next years to come, even if they manage to create another children, the pain of the loss of that child will be with them and will be transferred through (to the next generation). Now you have to understand that comes off the books of Mr.

Netanyahu, the American President, the guy who built the bullets, the guy who transported the bullets, the guy who fired the bullet and the rest of it.

It's for both sides, it's not just for the Arabs, for the Israelis, or the rest of it. But, if man understands what it means to take another life, man will walk away from a lot of it. Unless he doesn't care about it, but in a way he will care about it. We cannot change it. (2:38) And once, what we call, the maturity comes, that you can see the connection between your Soul and your physicality, what this does, effects the other, then people will start then changing direction and dimension.

I was 22, 23 years old. I went to for a project to a government. The government officer said you're in the wrong place go to this office. I went to the new office. A guy in front of me pulled a drawer, what those days if you remember was folded printers on the computers on the table, the white seats if you remember with the holes on the side of the book, about maybe 30-40cm height. He said to me, "Mr. Keshe, we don't need this what you're bringing us. We need what's in here." I said, "What's in there?" It was a list of weapons. They said, "When you came they know how we can get this, we want this." I said, "You know something? You can keep it on your desk. I don't even touch it. I never, I never touch weapons, anything which takes another the life." That pile I knew what I can make, I would have made millions out of it. Because I knew every piece where I can get. I looked into it, I didn't know what it was. When I looked I realized what it is.

And I said no. I chose not to have a lot of what you call it, worthless numbers in the bank account. (2:40) Then maybe one piece of that taking a life and that was when I was 22, 23. I came home and I said to my mom, "Do you know what happened?" And I explained to her. She said, "You never change, do you? You never sell anything for the money. When it comes to your Soul, when it comes to your Ethos." I said, "What's the use? I have to pay for it and I don't like to pay heavy for it." We choose. It's our choice. And some people choose a different way.

It's the same, it's not the first time you... I explained to you what happened with IRA in Northern Ireland, when the MI5, MI6 people told me in Manchester, "Mehran, you're not English, putting your life (in danger). Is worth it? Because it saves life." And it's the same today with Iran and the Israel war. "I'm at a high risk." Any of them decide the bullet, it's gone. But, it's worth taking the chance that, maybe, not another child in Palestine, or in Iran, or somewhere else dies. And, this is your, this is what you judge, the judgment comes from you, I prefer to suffer, and whatever and the pressures of the Keshe Foundation. And then, what was the suffering and the death of one child that he... or a father or mother, the child becomes, because that'll go on for decades, that pain. And this is how they have to decide and it's their decision. Everybody "makes their own bed and they sleep (in it). (2:42)

Q: Mr. Keshe I see someone's written something in the chat that's very beautiful about the wishes for humanity as part of the creation of bringing a permanent peace to ourselves, this planet and beyond, the path of peace is through the Keshe Foundation, as already

well known by the world leaders, and to bring into public domain, time for change, time to move, as shown today. Thank you Mr. Keshe for all you do, for all, thank you.

K- It takes a long time to change a naughty child to a good child. And this child is very naughty.

Q: We are present with you Mr. Keshe, thank you.

K- Any other questions?

Q: ... The "Theta Healing" modality is a prayer technique to connect to the Creator of all that is, by merging into a white light in a plane of existence called the 7th plane of existence. From there, we reprogram belief systems. From this theta brainwave, the subconscious mind, once beliefs change, reality constructs shifts. Question, as we reprogram our mind and replace negative emotions, and undo the limitations of the mind, (2:44) we then appear to get closer consciously with our Soul connection. What is your view on belief transforming with elevating the Soul? Thank you.

K- Belief is a wavelength, it's an energy. And so your energy can change a lot of things, depends if you give to it, or you take from it. You call it a belief, I look at it in a different way. What you believe in, you work in, you work in dimension of, you create energy for it, and you spend that energy on it. And it's as simple as that. So, does your belief changes something, if you understand belief or emotion, as part of the energy of the physicality of the man? Yes, it does, because it's transferable.

Any other question?

Q: ... It's a further question. So when we wake up in the dream, can we stay in that reality of the dream? Instead of returning to this one, is this transmutation in your definition?

K- You can do anything once you understand how it works. It's like walking, once you learn to walk, you can jump, you can dance, you can do whatever you like.

Any other questions?

R: I see we got the Q&A covered, we got the Webinar chat covered.

K- Yes, we can call it a day.

R: I think you want to. (2:46) How about one more question from Paying Peter. While there is actually a question too from Anna that maybe Dean or someone from the UK group can help. She's asking where can I find someone that teaches the technology in London, UK.

K- Kawoos. Kawoos ?? is your

R: How do they contact that?

K- Oh, contact KF, we put you in touch with Kawoos. We have a lot of good people in... is... Jonathan is there, a lot of people in London... There's a bunch of what I call, MI5 and MI6 people. You know about it?

R: Are they in the Telegram group or is the Telegram a separate thing?

K- Oh yeah, a couple of them are in Telegram groups, are in English Telegram, go on the English Telegram.

R: I tried, yeah I tried to find the link there and I couldn't find it in the group, so maybe Dean or someone could put the link in the Youtube, that would be great.

K- Kawoos says, "I am present, he is here." There is a number of people in the UK. You got Stephania, it's the best when she travels all over the God knows country. Italian given the freedom of England, God help the English with it. But...

R: Okay, okay, he's passing his information on there... Not sure if they can connect that way, they'll find a way, I'm sure.

Q ... (2:48) What's the difference between the spaceship, which we are... Spaceship that's to be showing in Iran, and the one that's being promoted during, or usually being promoted during our break, the Universal Flight Enhancement Spaceship Unit.

K- Pardon? Can you repeat?

Q: What's the difference between the spaceship showing in Iran, that's expected to be shown in Iran, and the one that's promoted in our intermission, often the Flight Enhancement...

K- Very, very, very, very, very different. Very, very different. Extremely different. Totally, totally different. It's different fuel, it's different technology. Very different. What you see in the sky of Tel Aviv, this system is primitive compared to where we are in technology. We have stepped into the Universal Energy, and when you are not aware of the knowledge and technology, when you look at this what we see on the screen with the formation of the three systems, these three systems create a dome. But, it is part of what we call, the same technology, but what I call, (2:50) different understanding of it. And more advancements in technology. This is a matter state transportation, where we talk about transmutation.

If you go very much further into understanding, you see the lights in the sky, now they have to create a physical condition to create this. Now imagine you can do the same with your Soul. And, this is what the evolution of science is. And we are developing continuously into the next step and next step. We can teach but if it's not understood, it's

difficult. So even with our research, it takes time because our scientists have to understand the technology that they can apply it. I set the framework of where we're going, two or three years ago in the lab, and it's taken to the next step, next step, but in essence the principle hasn't changed. Knowledge cannot be force-fed, knowledge needs to be understood. And this is a Knowledge of Creation. It has to touch the Soul, then it teaches the physicality, and that's the difference. (2:52)

Any other question?

R: Perhaps one more with Claudia who is asking in the chat.

K- Have you seen something very interesting on the chat? A guy called Jalal, he says, "No raised hand for Jalal today".

R: Yeah, a very suspicious comment. It makes us wonder about all the unasked questions now. Clever, Jalal. But just above his comment is Claudia's comment...

Q: ... How is the research team in .. USA?

K- ... Our operation in USA has more or less come to a halt. We do not research as such directly as Keshe Foundation. And everything is concentrated in two or three labs, one public, two hidden for security reasons. The whole structure of the Keshe Foundation is dismantled in USA about a year ago, now. And we are concentrating primarily in two or three locations, and we keep it that way.

Q: ... (2:54) I have a question about this Star Formation. When they showed up in Tel Aviv skyline, is supposed to hit the Israeli defense system .. ?

K- These are entirely defense, which means they are attracting and creating fields, it is not there for attack. There is a reason, they use this, and this...

Q: And if they are...

K- Pardon? Pardon? There is a reason this technology was used. It's not for offensive, it's for diversion and defense. You just go on the Internet, you see this video so clearly, many people have posted it now. But while you're watching live the situation, from people who were posting things, we could see this live. And, you know, I said to one of Knowledge Seekers who was near me, he said, "Look, they're using the technology, and that's the beauty of it." The biggest problem is why Iran doesn't use it for its own defense. This is something which has puzzled me, that we shouldn't have that kind of losses last week, or three, four days ago in Iran. (2:56) But that's something which has baffled me. Why this was not put in action? Because it could have changed a lot of things.

R: Maybe they consider it kind of an "ace card" to keep held back until the time is right.

K- There's no more time, you have to understand American... It's very interesting if you see one of the pictures on the Internet, couple of years ago. There's a picture of Iran and about 10 or 15 American bases around Iran. Afghanistan, Pakistan, God knows, Saudi, Qatar, Iraq, in Northern Iran, and the rest of it. And he says, "Why are these Iranians so close to us?"

R: Yes, I've seen that... If you see a map of the area, it's like Iran is the void in the middle, and there's just completely surrounded by US bases, all... in every country around Iran.

K- Don't forget, the Americans used to have their base in Iran, for years. Iran was one of the only bases they had for years. The peanut man changed it.

R: Hmm, Mr. Carter.

K- Mr. Carter, the peanut man. So, it says... you see, you got... we have a very big problem in Iran, some of our own diplomats, some of our own politicians, some of our own ministers, carry two, three different passports in their pocket. And this is the problem, we do not have people who are thoroughly loyal to the nation, they're loyal to their pockets. And many times we have seen in international negotiations. (2:58)

It's come out, it's not something hidden. You call ?? about Mr. Nazif, who was the head of negotiation with Iran, 5+1, if you remember, General Rouhani. Now he's become a minister, or like a position of like advisor to prime minister, or to the president. But it's very interesting, he's educated in the US, that it's on the Internet you can go and check. He's done a national military services on American, in American Army, as a Marine, that kind of thing. And he's come to Iran to be a Minister and Negotiator, and that's why we couldn't go anywhere, he was just working for his own pocket. He has two American passports with two different names in his pocket, and if one gets caught he can jump with the other one. And this guy does not work for Iran, he works for his paymasters. Check it, he's got his PhD in US, he's got his military service, he never served in Iran military or army or anything, he just brought in, to be the next President of Iran when they create mess in Iran. And this is our problem. And it's the same with half of the Iranian cabinet, they have two, three passwords in their pockets, and hundreds of different bank accounts, in Rothschild's family accounts, nobody can find them. And, this is the pitfall with many nations. It is not Iran, this is not ?? typical. Most of the Minister around the world carry other nations passport, in case they jump.

Any other question? Or shall we call it a day? (3:00)

K- ... Jalal finds his question one day. No problem. Shall we call it a day?

R: Yes, I think you've earned your keep here today. Thank you Mr. Keshe.

K- Thank you very much. Just remember that tomorrow we don't have a session, because it's 1st of November. many Knowledge Seekers in Europe will not be able to come. And

... we announced the session for Iran, after we know the outcome of this conflict. It still will be held, the new people registered will be invited, the same proposition. And we hope we should be able to carry on. I received a note from our webmaster people there are new products and packages of products, for New Year, Christmas will be hosted in different combination gift bags. And we thank you for your support in that direction. Thank you very much, see you hopefully next week.

R: Great, thank you very much Mr. Keshe once again.

K- There is something here, which I forgot. The gentleman who was asking for the French farming, contact Joel Ricard in France. He does all the farming in French community. He can help you with it. Thank you very much.

R: I think Joel offered in the chat here, so... Hopefully they can make that connection.

K- Yep. Thank you very much. And see you next week.

562 KSW October 31, 2024

END
